Projects

Figbuild 2026 – Sol Mar 11-15, 2026

Designed *Sol*, a metacognitive journaling app prototype that visualizes cognitive and emotional engagement to generate actionable insights, helping users recognize patterns in focus and productivity.

Collaborated in a research-driven design process using Figma, Adobe Creative Suite, and Blender while developing skills in user research, speculative design, problem-solving, and cross-team communication.

Stormhacks 2025 – Meal4Me Oct 4-5, 2025

Created *Meal4Me*, an app that recognizes and scans your fridge and implements advanced patterns in analyzing ingredients, helping students turn their limited cooking options into fully-fledged meal plans.

Developed the iOS app in SwiftUI after wireframing in Figma, delivering native performance and a smooth user experience.

Built an image processing pipeline (resize, compress, base64) that reduced upload size from **4.5MB to 0.25MB (97% reduction)**. Improved system scalability by splitting Gemini Vision and Text API calls, reducing payload size by **50%**, and lowering projected API costs for 10K users.

Course Projects

Fuorisalone design district microsite – IAT 238 Mar 15-Apr 15, 2026

Created an experimental website for visitors of Fuorisalone design district 2024 and encapsulating all its exhibits with concise UX/UI design.

Collaborated with a group of multi-disciplinary designers to work through pushing changes to mockups of design exhibits and producing content through Figma.

Refined the site through multiple rounds of iteration and peer feedback, producing a user-first interface with a content strategy that displayed all exhibits equally and effectively.

Pet adoption website – IAT 235 Nov 12-Dec 14, 2025

Designed a pet adoption website in HTML/CSS by applying user research principles to inform layout and content decisions, creating an efficient, easy-to-navigate experience for prospective adopters.

Built the site following clean coding practices, structuring semantic HTML and modular CSS to simulate a client-ready deliverable and ensure maintainable, scalable code.

Streamlined the adoption browsing experience by prioritizing clear information hierarchy and intuitive navigation, resulting in a clean, professional interface comparable to real-world client work.

Skills

Research Strategy: Experimentation, Content Strategy, Process Analysis.

Production: UX/UI design, Motion Graphics, Content Strategy, Illustration, Wireframing, Prototyping, Web development.

Tools & Software

Figma, Adobe Suite (AP, AI, ID), Unity, Blender, Notion, HTML, CSS, React, JavaScript

Volunteer Experience

Director of Events - IATSU FROSH (SFU Surrey) Jun 2025 – Sep 2025

Designed and executed interactive orientation games for 200+ incoming first-year students by collaborating with a multidisciplinary team, boosting event engagement and easing the transition to university life.

Led logistical planning for large-scale FROSH events by coordinating schedules, resources, and volunteer teams, ensuring smooth execution across multiple activities.

Planned and executed large-scale orientation activities by designing interactive games tailored to first-year student engagement. Strengthened leadership, project management, and collaboration skills by working within a multidisciplinary team to promote inclusivity and excellence.

Marketing Coordinator – SFU SURGE (SFU Burnaby) Dec 2025 – Current

Worked with a team of multidisciplinary coordinators to promote brand awareness and boost brand image for upcoming events.

Created and led video editing sessions, brand identity, and media production of marketing campaigns for major events, including hackathons and design jams.

Drove the upcoming StormHacks campaign strategy, projecting a 200% increase in participants compared to the previous year.

General Volunteer – Vancouver Christmas Market (Jack Poole Plaza) Oct 2022 – Dec 2022

Expanded professional network and public speaking confidence by engaging directly with thousands of market visitors, contributing to a welcoming and positive guest experience.

Work Experience

Lifeguard/Instructor - City of Burnaby Dec 2023 – Current

Safeguarded up to 50 daily patrons in a high-traffic pool setting by enforcing safety protocols and monitoring water activity, maintaining professionalism throughout employment.

Developed leadership skills through safety enforcement, communication, and decision-making in high-pressure situations. Responded to emergencies, demonstrating initiative and reliability.

Recognized with Employee of the Month award for delivering attentive, patron-focused service and mentoring newer staff on safety procedures.

Swim Instructor - Pedalheads Jan 2023 – Jun 2023

Instructed swimmers ranging from ages 3-15 with varying skill levels by adapting lesson plans to individual needs, helping students advance to the next swim level within the season.

Built an inclusive learning environment for children with diverse abilities and comfort levels by using patience-based teaching techniques, increasing student confidence in the water.

Education

Simon Fraser University - Interactive Arts and Technology, Bachelor of Science, Designing Interactions concentration

Sep 2024 – Jun 2028

Awards

Certifications: Standard First Aid, National Lifeguard, CPR-C/AED, OnShape modelling certificate, Swim Instructor
